AM V05

Hand pallet truck for display and part load pallets (500 kg)

The AM V05 is the optimum solution for collecting quarter and half Euro pallets. It offers real advantages wherever display pallets have to be moved frequently, e.g. on the shop floor. Small special pallets can also be transported because the forks can be manually adjusted in the range of 140 mm to 585 mm.

Whatever you transport with the AM V05: The advantages of user-friendliness, robustness and the reliability of Jungheinrich hand pallet trucks pay dividends. Standard Euro pallets can also be transported.

Benefit from the advantages

A half pallet is picked up from a standard Euro pallet

Ergonomic operating handle

Picking up a standard Euro pallet

Designed for many applications

Loading and unloading of small load carriers on a Euro pallet cannot be achieved with a standard hand pallet truck. The AM V05 provides the solution.

Due to individually adjustable forks from 140–585 mm, non-standard load carriers can also be picked up and transported. Standard Euro pallets can also be transported.

Easy to handle

The easy-to-use controls are equally suitable for both left and right-handed operators. The special lowering valve enables loads to be lowered precisely.
